

Case Study

Company Profile

This company produces economical and efficient steel and power from its own captive coal and iron-ore mines and benefits its customers. With an enterprising spirit and ability to recognize future trends, this company has been showing a remarkable growth. The company has scaled new heights with the combined force of innovation, adaptation of new technology and the collective skills of its 15,000 strong, committed workforce. It has won wide acclaim for its efficient operations and commitment to environment & society. This organization has consistently tapped new opportunities by increasing production capacity, diversifying investments, and leveraging its core capabilities to venture into new businesses.

Steel plants are contributing in a huge way to world economic growth. While the existing units are being modernized, a large number of new steel plants are also coming up in different parts of the world based on modern, cost effective, high-tech methods. But as the steel industry is not much successful to match its production to the real demand for steel and the timely completion of the projects, the industry is seeking ways to enhance their performance. One of the biggest steel producing companies of India also sought guidance from AstroWix for better management of their production.

Business Need

As this organization was expanding its business with various new projects coming up in different parts of the world, its future was studded with challenges and that is why for better management of all the projects they wanted their professionals to train in professional project management practices. They also wanted to deploy some suitable technology to improve their IT system and in their plant locations too.

Solution

Realizing the company's needs, AstroWix helped them by deploying Microsoft Enterprise Project Management technology and Microsoft Project tool. Following that, AstroWix designed for them an extensive training program to educate them on using these tools to their best potential. AstroWix also provided support to the professionals in using those tools to their maximum benefit and assisting them in operating those tools as they were complex enough to have difficulties for the new users.

Benefits

The implementation of Microsoft EPM Solution helped the organization's staff to easily manage their projects and people working at various plant locations for better business growth. The tool provided them insight into how projects and resources align with business objectives and affect performance. It helped them to make faster, more informed business decisions and continuous process improvement. Implementation of Microsoft Project helped to take full control of their projects. This MSP tool is packed with powerful features and techniques for ensuring better visibility and control of projects. The professionals were immensely benefitted by the comprehensive training on this complex tool for increased efficiency and improved management of projects.

For More than a Decade, AstroWix has been delivering excellence in Project Management to more than 250 fortune 500 companies and government organizations. We provide expert project management services to help organizations and their people perform to maximum potential.
