

Company Profile

This tele power giant provides wide-ranging infrastructure solutions to wireless telecom players both in India as well as overseas. Based on innovation, research and development, this company has developed a broad range of new products that help provide cost-effective, energy-efficient, integrated infrastructure solutions to telecom companies. This company provides End-to-End solutions by launching a complete package to fit various environment and temperature parameters at telecom sites, avoiding the running of backup systems like diesel generators. It has made its presence felt in the global market through its own establishments, channel partners, and associates.

Faced with ever-increasing competition, deregulation, and sophistication of information technology, the telecommunications industry is in an agile situation. With the growing market needs and rapid changes in the business environment, the industry is experiencing constraints in some areas. That is why it has been necessary to implement a Project Management System (PMS) for planning, monitoring and controlling various projects dealing with this industry. Recently a large telecommunications company faced challenges associated with implementing a technique for planning, monitoring and controlling various telecom towers across India. AstroWix, being a pioneer in providing project management solutions, established a program system to address those challenges and coordinate in its transformation.

Business Need

The key solution of this company is based on advanced technology and perfect service to address the typical needs of the wireless telecom industry. In the process, the solutions have been influential in saving time, cost and energy while delivering the best performance. The company's unique solutions include Energy Management Solution.

Being in this service for a long time, the company wanted to have more efficient techniques of reporting and monitoring throughout each phase of managing a project. As their business and projects are expanded throughout the world, the senior leadership felt some difficulties in coordinating with its different professionals and teams at various levels. For them, getting the project status and delay reports from time to time were a major concern for running their projects.

Keeping these problem areas in view, the company wanted to improve the network systems and IT services equipped with a dual program for software process improvement.

Solution

While addressing the company's challenges in getting an improved technique for perfect reporting and monitoring of the project needs, AstroWix initiated by assessing its program management capabilities and then proceeded with deploying Microsoft Enterprise Project Management Solution to support the integration of tasks to be performed. Using this system, the team could capture and validate the actual hours worked and measure progress against the plan. In addition, detailed analysis of alternatives could be provided to the management with the development of an effective Monitoring and Tracking System which helped the company in Time and Cost management. AstroWix strongly recommended the implementation of a program management office that would develop and implement a set of project planning, tracking, and oversight processes throughout the organization.

One of the first steps was developing schedule and resource tracking processes. With this integrated schedule, senior management officials could view each project; its life cycle, resources deployed and the cost invested on each project. This information could be accessed daily, weekly, monthly, or yearly.

Benefits

The deployment of Microsoft EPM Solution helped in the effective monitoring and tracking resulting in improved management of time and money. It helped streamlining online and on-time reports which were accessed by the project leaders and managers as well as the senior leadership. AstroWix enabled an improved project management process delivering overall cost reductions, improved schedules, and the alignment of business priorities. In this highly competitive industry, time to market for new services is critical to maintaining a competitive edge. For this organization, proven project management processes and the central monitoring system provided the structure to improve the software development process, reduce development cycle times, and stay ahead of the competition.

For More than a Decade, AstroWix has been delivering excellence in Project Management to more than 250 fortune 500 companies and government organizations. We provide expert project management services to help organizations and their people perform to maximum potential.
